

Symposium

To Koinon – Heidegger and the Political

Where: Södertörns University, Stockholm

When: 13-14 of April

Welcome to a symposium concerning one of Martin Heidegger's most political texts; "*Koinon – aus der Geschichte des Seyns*", that was published in 1998 (Collected Works, GA 69). In this text, written in the years of 1939-1940, Heidegger delivers an analysis of total domination in the framework of his readings of the metaphysical tradition of European philosophy. His interpretations of "power", "domination", "crime" and "communism" in this text are unique in his work.

In order to approach this text we are arranging a symposium on the 13:th and 14:th of April together with some international guests who are specialists on the subject. The text is not available in English yet, but the symposium will be held in English. The original text is attached with this mail together with a program.

The symposium is open for the public.

For registration send an email to:

gustav.strandberg@sh.se
